

QUARTERLY REPORT TO 30 JUNE 2013

HIGHLIGHTS

- **Programme of Works (POW) submitted for the infill drill programme at the Medcalf Project.**
- **Metallurgical test work underway at the Medcalf Project.**
- **Gold exploration programme designed for the Gascoyne Project.**

Audalia Resources Limited (ASX: **ACP**) is pleased to present its report for the June 2013 quarter.

GASCOYNE PROJECT

The Gascoyne Project comprises 100% owned tenements covering 311 km² that are highly prospective for Lead (Pb), Zinc (Zn) and Copper (Cu) deposits, located in the Gascoyne Region, Western Australia. It is located approximately 250 km to the east of Carnarvon and 1200km north from Perth.

The Gascoyne Project covers an area of mid-Proterozoic aged, metamorphosed sediments and volcanic rocks which have been subjected to several phases of tectonic deformation and intruded by granitoids. Exploration work and drilling to date has used the geological model of base metal mineralisation being associated with coincident soil geochem and “thumbprint” magnetic anomalies. Historical RC drill testing from one of these targets has returned significant intercepts of 2.3% Pb and 0.9% Cu. Lead sulphide (galena) and copper sulphides (chalcopyrite) were identified in the drill chips.

Audalia is targeting a Broken Hill Sedimentary Exhalative (SEDEX) massive sulphide Pb, Zn and Cu deposit.

Exploration work programme for 2014 financial year

Audalia has reviewed the results from last year’s soil and rock chip programme focussed on exploring for a base metal target and has approved the field geologist’s recommendation to assess the project for its gold potential.

Inspection of the Geological Survey of Western Australia (**GSWA**) Lockier and Mangaroon 1:100 000 map sheets shows similar lithologies and rock ages in the Mangaroon district and the Gascoyne Project tenements.

Historic sampling of the Mangaroon district showed alluvial gold to be widespread.

A programme has been designed for gold exploration and is scheduled to commence in the September 2013 quarter, with results expected to be available during the December 2013 quarter.

MEDCALF PROJECT

The Medcalf Project is a vanadium-titanium project located some 470 kilometres south east of Perth near Lake Johnson, Western Australia. The Medcalf Project comprises five granted Exploration Licences E63/1068, E63/1133, E63/1134, E63/1405 and E63/1406 and Prospecting Licences P63/1528-33 inclusive and P63/1560 and P63/1561 covering a total area of 24 km².

The Medcalf Project lies in the southern end of the Archaean Lake Johnston greenstone belt. This greenstone belt is a narrow, north-northwest trending belt approximately 110 km in length. It is located near the south margin of the Yilgarn Craton, midway between the southern ends of the Norseman-Wiluna and the Forrestania-Southern Cross greenstone belts.

Figure 2: Medcalf Project - Location Map

During the quarter, Audalia engaged Bureau Veritas Minerals Pty Ltd (formerly Amdel) to conduct a series of test works to determine the likely processing method and likely metallurgical recoveries for the project. The results from the metallurgical test work are expected to be available during the September 2013 quarter.

During the June 2013 quarter, the Board approved to upgrade the current Inferred Resource category to Indicated and contracted the Company's consulting geologist, Ravensgate Pty Ltd, to design a drill programme to complete that scope of works.

A Programme of Works (**POW**) was submitted to the Department of Minerals and Petroleum (**DMP**) on 15 June 2013 for the drill programme of 130 holes to a maximum depth of 50m on an 80m by 80m drill pattern.

The Company is hopeful the POW will be granted by the DMP during the September 2013 quarter.

CORPORATE MATTERS

The Company acknowledges its cash position at 30 June 2013 and its estimated cash outflows for the September 2013 quarter. The directors are assessing all funding alternatives to ensure Audalia can achieve the near-term milestones it has set, meet its short term commitments and progress its longer term strategic objectives.

Audalia also continues to actively review and assess other projects in the resource sector, both in Australia and overseas, by way of acquisition or investment/ joint venture.

Competent Person's Statement

The information in this report that relates to Exploration Results is based on information compiled by Mr Brent Butler, who is a member of the Australasian Institute of Mining and Metallurgy. Mr Butler is a consultant geologist with 30 years' experience as a geologist. Mr Butler has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration and to the activity which he is undertaking to qualify as a Competent Person as defined in the 2012 edition of the 'Australasian Code for Reporting of Exploration results, Mineral Resources and Ore Reserves' (JORC Code). Mr Butler consents to the inclusion in the report of the matters based on his information in the form and context in which it appears.

Notes

- 1 The quarterly report provides a basis for informing the market how the entity's activities have been financed for the past quarter and the effect on its cash position. An entity wanting to disclose additional information is encouraged to do so, in a note or notes attached to this report.
- 2 The "Nature of interest" (items 6.1 and 6.2) includes options in respect of interests in mining tenements acquired, exercised or lapsed during the reporting period. If the entity is involved in a joint venture agreement and there are conditions precedent which will change its percentage interest in a mining tenement, it should disclose the change of percentage interest and conditions precedent in the list required for items 6.1 and 6.2.
- 3 **Issued and quoted securities** The issue price and amount paid up is not required in items 7.1 and 7.3 for fully paid securities.
- 4 The definitions in, and provisions of, *AASB 6: Exploration for and Evaluation of Mineral Resources* and *AASB 107: Statement of Cash Flows* apply to this report.
- 5 **Accounting Standards** ASX will accept, for example, the use of International Financial Reporting Standards for foreign entities. If the standards used do not address a topic, the Australian standard on that topic (if any) must be complied with.
