

## QUARTERLY REPORT TO 30 JUNE 2012

---

### HIGHLIGHTS

- **Planned exploration programme at the Gascoyne Project;**
  - **Planned and marked out a drill programme for Medcalf Project;**
  - **Audalia debuts at Mines and Money show in Beijing.**
- 

Audalia Resources Limited (ASX: **ACP**) is pleased to present its report for the June 2012 quarter.

### **GASCOYNE PROJECT**

The Gascoyne Project is located approximately 100 kilometres north of Gascoyne Junction east of the Lyons River and tributaries. The tenements consist of five granted Exploration Licences, E09/1568-70 and the recently granted Exploration Licences E09/1824-25. The Gascoyne Project covers an area of 32,400 Ha (324 km<sup>2</sup>).

The regional setting of the Project is near the western edge of the Neo-Proterozoic Morrissie Metamorphic Suite rocks with overlying Permo-Carboniferous sediments of the Carnarvon Basin. The metamorphic belt acts as a buffer zone between the Archaean Yilgarn shield and the overlying cratonic Proterozoic Basins and is orientated WNW-ESE with well-developed schists, shears and intrusives parallel to this dominant strike. Therefore the area is a complex juxtaposition of sediments, granitoids and mafics with accompanying structures such as shears and faults.

The region was explored for gold, base metals and diamonds by large companies such as BHP, MIM, Western Mining and Rio Tinto using regional stream sediment, soil and rock chip sampling. These explorers considered the Gascoyne Province to be prospective for Broken Hill Type (BHT) Ag-Pb-Zn mineralisation based on a study of Zn-bearing spinels (gahnites) in the late 1990s.

### **Work proposed next quarter**

An exploration programme with a budget of \$150,000 was designed during the June 2012 quarter. The programme will comprise of an Induced Polarisation (IP) survey over key targets. This will be followed up with auger drilling and soil sampling to identify targets for drilling.

## **MEDCALF PROJECT**

The Medcalf Project is located some 470 kilometres south east of Perth near Lake Johnson, Western Australia. The Project comprises three granted Exploration Licences E63/1068, E63/1405 and E63/1406 and covers an area of 1,740 Ha (17.4 km<sup>2</sup>).

The Project lies in the southern end of the Archaean Lake Johnston greenstone belt. This greenstone belt is a narrow, north-northwest trending belt approximately 110 km in length. It is located near the south margin of the Yilgarn Craton, midway between the southern ends of the Norseman-Wiluna and the Forrestania-Southern Cross greenstone belts.

Previous work carried out by numerous holders of the tenements over the last 40 years includes exploration for nickel, titanium/vanadium, platinum group metals (PGM) and gold. The primary vaniferous titanomagnetite mineralisation occurs within the pyroxenite zone between the basal peridotite and upper gabbro zones of the sill. The lateritic weathering of this sill has removed much of the silica, calcium and magnesium in solution thus resulting in residual concentrations of iron, titanium and vanadium oxides. This secondary enrichment potential hosts economic ore.

### **Work completed during the quarter**

A drilling programme was designed by Mr Stephen Hyland, a resource geologist from Ravensgate during the June 2012 quarter. The forty six drill hole drilling programme will be carried out over the Vesuvius vanadium prospect on a 160m by 160m pattern, with each hole planned to be drilled to a depth of 50m. The programme has been marked out by consultant geologist, Mr Terry Taylor in the field. A budget of \$250,000 has been allocated for the programme.

A flora environmental survey is being carried which will be submitted to the Department of Mines and Petroleum together with the Programme of Works during the September 2012 quarter.

## **CORPORATE**

During the June 2012 quarter, Audalia attended the Mines and Money Conference held in Beijing on 19 and 20 June.

Audalia continues to actively review and assess other projects in the resource sector, both in Australia and overseas, by way of acquisition or investment/ joint venture.

### **Competent Person's Statement**

The information in this report that relates to Exploration Results is based on information compiled by Mr Brent Butler, who is a member of the Australasian Institute of Mining and Metallurgy. Mr Butler is a consultant geologist with 27 years' experience as a geologist. Mr Butler has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration and to the activity which he is undertaking to qualify as a Competent Person as defined in the 2004 edition of the 'Australasian Code for Reporting of Exploration results, Mineral Resources and Ore Reserves' (JORC Code). Mr Butler consents to the inclusion in the report of the matters based on his information in the form and context in which it appears.

## Notes

- 1 The quarterly report provides a basis for informing the market how the entity's activities have been financed for the past quarter and the effect on its cash position. An entity wanting to disclose additional information is encouraged to do so, in a note or notes attached to this report.
- 2 The "Nature of interest" (items 6.1 and 6.2) includes options in respect of interests in mining tenements acquired, exercised or lapsed during the reporting period. If the entity is involved in a joint venture agreement and there are conditions precedent which will change its percentage interest in a mining tenement, it should disclose the change of percentage interest and conditions precedent in the list required for items 6.1 and 6.2.
- 3 **Issued and quoted securities** The issue price and amount paid up is not required in items 7.1 and 7.3 for fully paid securities.
- 4 The definitions in, and provisions of, *AASB 6: Exploration for and Evaluation of Mineral Resources* and *AASB 107: Statement of Cash Flows* apply to this report.
- 5 **Accounting Standards** ASX will accept, for example, the use of International Financial Reporting Standards for foreign entities. If the standards used do not address a topic, the Australian standard on that topic (if any) must be complied with.
